Mar 24, 2026

Shirur Yashrah Zulfiquar Ali

has successfully completed the online Specialization

Business Analytics

Our world is increasingly digital, and business leaders need to make sense of the enormous amount of available data in order to make key strategic business decisions. By completing this Business Analytics specialization, the learner now has a well-rounded knowledge of business analytics that integrates the areas of data science, analytics and decision making. Specifically, the learner can: - Recognize different data strategies - Use reliable ways to collect, analyze, visualize, and utilize data in organizational decision making - Understand data modeling and predictive analytics at a high-level - Use basic methods of business analytics with various tools and data sets - Make informed business decisions via analytics across functional areas to enhance profitability and competitiveness

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
